

PLAY STORE

INTRODUCTION

PlayStore Token is an exciting platform that's at the forefront of game app development! With its focus on merging AI capabilities with game creation and its emphasis on accessibility for users without extensive coding knowledge, it is poised to make game development more inclusive and innovative.

PlayStore Token revolutionizes the game app development landscape by providing an accessible and intuitive platform for anyone passionate about creating their own games. No longer limited by technical barriers or the need for extensive resources.

GOAL

PlayStore Token empowers individuals to transform their game ideas into fully functional and engaging experiences. Play Store Token aims to integrate artificial intelligence in various aspects of game development, such as character design and gameplay mechanics, sounds like a significant advancement. By leveraging AI algorithms, users can enhance their game creation process and make it more engaging and immersive.

MISSION

PlayStore Token's mission is to revolutionize game app development by providing an accessible and intuitive platform. By eliminating technical barriers and the need for extensive resources, it empowers individuals to unleash their creativity and bring their game ideas to life. PlayStore Token focuses on streamlining the development process and open up new creative possibilities for game creators.

By combining our innovative gameplay mechanics, cross-platform compatibility, and the power of blockchain technology, we believe PlayStore token has the potential to reshape the gaming landscape and introduce new players to the cryptocurrency industry.

HOW IT WORKS?

PlayStore Token approach has the potential to make a significant impact on the game development landscape. By combining user input with AI-generated prototypes and providing a wealth of pre-built resources, it not only simplifies the development process but also empowers creators to focus on the creative aspects of their games. This indeed lower the barriers to entry for aspiring game developers, fostering a more diverse and innovative gaming ecosystem. Within the platform, users have access to a vast library of pre-built game components, assets, and templates. These resources empower creators to enhance their games quickly, saving time and effort. With AI-powered suggestions and guidance, users can refine and customize their games to match their unique creative vision and preferences.

TOKEN ECONOMY

PlayStore Token operates on a secure blockchain network to facilitate secure and transparent transactions within the platform. Tokens serve as the primary means of accessing premium features, acquiring game assets, and engaging with the PlayStore ecosystem. Through a carefully designed token economy, users are incentivized to contribute, collaborate, and participate actively in the platform's growth and development.

COMMUNITY AND FUTURE DEVELOPMENT

PlayStore focus on building a vibrant and collaborative community around game development, enthusiasts, and players is commendable. By providing networking, knowledge sharing, and collaboration opportunities, the platform not only supports individual creators but also fosters a sense of belonging and collective growth within the community. The active involvement of community members in shaping the platform's future through contributions and decision-making processes ensures that PlayStore remains responsive to the needs and aspirations of its user base. This community-driven approach could lead to a richer and more dynamic ecosystem for game development.

SECURITY AND PRIVACY

By prioritizing security and privacy, PlayStore ensures that users can confidently engage with the platform while safeguarding their data and transactions. The combination of robust encryption, decentralized smart contracts, and regular security audits demonstrates a commitment to maintaining a trustworthy environment for game development and collaboration. This focus on security and privacy is essential for building a strong foundation of trust among users.

DIAGNOSIS

PlayStore is an innovative platform that opens up game development to a wider audience. It's great to see technology being used to empower creativity and make game development more accessible. If there's anything specific, you'd like to highlight or discuss further about PlayStore, feel free to let us know!

FREE-TO-PLAY

The inclusion of a diverse roster of characters and the initial engagement with AI-controlled teammates and opponents add depth and variety to the gaming experience within the Web3 Lobby. The incorporation of daily tasks that allow players to earn rewards like in-game coins and surprises not only encourages regular engagement but also adds an element of progression and achievement. The special spectator mode that enables participants to connect to matches as spectators is a great way to foster community engagement and interaction.

This combination of features not only enhances the gameplay experience but also provides avenues for skill development, progression, and community involvement.

PLAY-TO-EARN

Players have the ability to create matches and define various parameters, such as the start date and time, number of players, game mode, and game map.

Additionally, players set the entry ticket cost for participating in the match. The corresponding number of \$PLAY tokens, equivalent to the entry ticket cost determined by the match creator, is deducted from their game balance.

Once a match is created and published, it becomes visible in the list of available and pending matches. Other players can browse this list and apply to join the desired match. Upon joining, the entry ticket cost in \$PLAY tokens is deducted from their game balance. Consequently, through the payment of entry tickets by participating players, the prize pool for the match is established.

Following the conclusion of the battle, the prize pool is distributed among the participants. \$PLAY tokens are equally divided among the members of the winning team. These tokens are credited to the game

balance and can subsequently be withdrawn to a personal cryptocurrency wallet or utilized within the PlayStore ecosystem.

WHAT IS \$PLAY TOKEN?

\$PLAY is a utility token within the game ecosystem, specifically designed as a BEP20 token on the Binance Smart Chain network. It functions as a unifying element, connecting all components of the PlayStore ecosystem.

Game provides play-to-earn opportunities, allowing players to earn \$PLAY tokens and other rewards by participating in matches, tournaments, and other in-game activities. This introduces a new paradigm where gaming becomes a potential source of income.

\$PLAY tokens can be easily traded, bought, or sold on both centralized and decentralized cryptocurrency exchanges. It not only provides flexibility and liquidity to existing users but also simplifies the onboarding process for new participants looking to enter the PlayStore ecosystem.

PROBLEM & SOLUTION

Problem:

Traditional video games often operate within closed ecosystems, where players' skills and assets are confined to the game environment. On the other hand, the cryptocurrency industry has struggled to attract mainstream adoption due to barriers like complex technology and limited use cases. Bridging these two worlds could indeed open up new opportunities. By integrating blockchain technology into games, players could potentially monetize their in-game assets or skills in a broader ecosystem. This could lead to more dynamic and participatory gaming experiences while also driving adoption and utility for cryptocurrencies.

Solution:

The Web3 Lobby sounds like an exciting development that could truly bridge the gap between traditional gaming and the world of cryptocurrencies. By offering a seamless integration that allows players to earn \$PLAY tokens while enjoying their favorite games, they are providing a compelling incentive for both gamers and cryptocurrency enthusiasts.

This approach not only adds a new dimension to gaming experiences but also introduces more users to the potential of blockchain technology and cryptocurrencies

HOW TO BUY:

Create a Wallet:

Download metamask or any other wallet of your choice from the app store or google play store for free. Desktop users, download the google chrome extension by going to metamask.io.

Get Some BNB:

Have some BNB tokens in your wallet to swap to PlayStore. If you don't have any BNB, you can buy directly on metamask, transfer from another wallet, or buy on another exchange and send it to your wallet.

Buy \$PLAY

Connect to Pancakeswap, import \$PLAY token in your wallet by pasting the contract id and swap against your BNB tokens.

ROADMAP

The milestones provided is anticipated to complete on time but it may vary based on factors such as market conditions, development complexities, and regulatory considerations. The roadmap is subject to adjustments and additions to accommodate the evolving needs of the PlayStore project and its community. Keeping the community informed about any changes or updates to the roadmap will help maintain transparency and trust.

Q1, 2024

Features:

- Player Profile screen
- Custom Game Rooms
- NFT Character Integration

Game Content

- Mage Character
- NewShot Character

Web3 Service

- Custom room added to service
- Play2Earn Games

Q2, 2024

Features:

- Development of Metagame continues
- Parties & Promotions
- Community Tournaments
- Spectator mode

Game Content

- Music Update
- Steam announcement

Web3 Service

- Automatic lobbies
- Automatic 20 Person War Lobbies

Q3, 2024

Features:

- Daily Quests
- Game Type: Tournament
- VC investment
- Game Type: Free for All
- Web2/web3 chat system

Game Content

- New Map
- Asian & European Servers

- Steam launch

Web3 Service

- Affiliate System
- Game fee smart contract
- NFT reward share smart contract
- DAO voting system

Q4, 2024

Features:

- Ladder updates for matchmaking
- Begin developing clans
- NFT Map Integration
- NFT Rental System
- Web2/web3 leader board

Game Content

- New Character
- Arcane Character Skin
- Disconnection bug fix

Web3 Service

- Daily bonus
- Offer Wall

RISKS

PlayStore is currently in the initial development stages and there are a variety of unforeseeable risks. You acknowledge and agree that there are numerous risks associated with acquiring \$PLAY, holding \$PLAY, and using \$PLAY for participation in PlayStore. In the worst scenario, this could lead to the loss of all or part of \$PLAY held.

If you have any specific questions or want to explore more about PlayStore or AI in game development, feel free to ask!
